Hiking can be a form of low cost, independent international travel. It includes the use of a backpack or other luggage that is easily carried for long distances or long periods, the use of public transport, inexpensive lodging such as a youth hostel, a longer trip when compared with conventional vacations and an interest in meeting the locals as well as seeing the sights.

It is typically associated with young adults who generally have fewer obligations and thus more time to travel. They also have less money to spend on hotels or private vehicles. It may include wilderness adventures or to travel within settled areas.

Hiking has evolved as travellers from different cultures and regions participated. A newspaper said that hikers are a heterogeneous group with respect to diversity and who attach meanings to their travel experiences. They also display a common commitment to a non-institutionalised form of travel which is part of their self-identification as hikers. Hiking as a lifestyle and as a business has grown considerably as a

result of low cost airlines and hostels or budget accommodations in many parts of the world.

While many people have travelled through the history with their possessions on their backs, the concept of modern hiking can be traced, at least partially, to the sixties and seventies. In fact, some hikers today seek to recreate that journey, albeit in a more comfortable manner.

While travel along the old routes is complicated due to unrest in many countries, hiking has expanded to other regions of the world. At present new trails are being planned to other countries.

Technological developments and improvements have also contributed to changes in hiking. Traditionally hikers did not travel with expensive electronic equipment because of concerns about theft, damage and additional luggage weight. The desire to stay connected, coupled with breakthroughs in lightweight electronics, has given rise to a new trend. Not only is there a shift in what hikers carry now, there is also a change in what they use to carry that gear. Hikers are becoming less and less reliant on the physical hiking in its initial form.

Of importance in hiking is a sense of authenticity. Hiking is perceived as more than a vacation and a means of gaining

experience. Hikers want to experience the real destination rather than the packaged version that is often associated with tourism, which has led to the assertion that hikers are against tourism/. _____ **50 wpm**

Hikers are criticised with criticism dating back many years. For example, the host countries and other travellers do not always agree with the actions of hikers. The perception of hikers seems to improve as hiking has become more mainstream./ _____ **55 wpm**
